

Sifflet de sécurité

T-7

BRIGHT IDEAS

BRIEF DESCRIPTION OF THE TOOL:

The leaflet provided with the whistle explains why this tool was created, namely to offer a sense of security to seniors when they walk alone in public places. It explains the benefits of the safety whistle, which, among other things, helps maintain the autonomy of elders while reducing social isolation.

The whistle is yellow with a spiral cord that seniors can attach to their wrist when they are outside their home. There is a designated place for the telephone number of the person. A key chain completes the ensemble. Finally, the emergency number of the Sureté du Québec (**310-4141**) is on the safety whistle.
