

ODIVA : outil de dépistage et d'intervention des victimes aînés

D-3

NO-TION

BRIEF DESCRIPTION OF THE TOOL:

Several criteria for assessing the risk of potential abuse or neglect. The RIFVEL questionnaire allows for identification of profiles and typical behaviors to see if there is cause for concern.

This test consists of four sections:

- Check the profile of the potential victim
- Check the profile of the person at risk
- Check the behavior of the potential victim for possible clues
- Check the behavior of the person at risk for possible clues

For each section, a guide for interpreting the results is proposed.
